ABOUT US

Octosec is one of the non-profit respected community in Turkey. Increasing the awareness of information security in our country is the main objective and it organizes various activities in this direction. The Hacktrick Cyber Security Conference and HackerKamp are the most well-known, tracked and focused events organized by the Octosec team. For more information, please visit octosec.net.

Canyoupwnme aims to guide cyber security enthusiasts and those who want to pursue a career in this area. It allows people to practice with existing lab environments and assumes a guiding role for people to set up their own lab environment. You can view detailed sharing of lab environments, solution scenarios and the use of common tools in cyber security at canyoupwn.me.

PROJELERİMİZ

HACKTRICK

Hacktrick is a Cyber Security event traditionally organized every year by the Octosec team, and the fifth is scheduled to be held. Hacktrick was co-organized with ICTA on May 17th with 20+ education classes and 2000+ participants, it is the most popular Cyber Security event in our country.

HACKERCAMP

It is a 2-day cyber security training camp organized by the Octosec team with university student communities.

GAME OF PWNERS

Game of Pwners is a CaptureTheFlag (CTF) contest organized by Octosec and CanYouPwnMe teams. The first in 2017, 500+ teams from around the world participated in this competition.

PWNLYDAYS

It is the training activity organized by the Canyoupwnme team and given to cyber security trainings.

GAME OF PWNERS

- CTF PROJECT -

ABOUT THE PROJECT

The Game of Pwners project organised by Octosec and CanYouPwnMe teams in order to raise awareness, to attract people who want to work in this sector by competing on an entertaining platform and to reduce the lack of experts working in the field of cyber security. That project, the first organised at 17-19 February 2017, is a Capture the Flag contest.

The competition is the first cyber security competition organized on an international scale took place in Turkey and there were 6 different countries in the top 10 teams. The intense interested competitive in Turkey and in the World which is Game of Pwners will be held in Hacktrick'18.

ABOUT THE PROJECT

The Hacktrick Cyber Security Conference is organizing the Cyber Security Awards by 2018. The winners of voting results will be determined in 10 different categories to be made by the 32-person jury in which the leading names of the industry and academic areas. The award categories set by the Hacktrick team for 2018 are as follows, and all categories will be customized for the cyber security area.

- The Company of the Year
- The R&D Company of the Year
- The Domestic Software of the Year
- The Students Community of the year
- The Social Responsibilities Project of the Year
- The Academic Staff of the Year
- The Academic Project of the Year
- The Researcher of the Year
- The Young & Promising Researcher of the Year
- The Blog of the Year
- The Blogger of the Year

BUGMINER

BUG BOUNTY PLATFORM

ABOUT THE PROJECT

“Bugminer is a bug bounty/hunting platform for the Octosec team’s long-running infrastructure. Bugminer makes it possible for many cyber security experts to test companies and institutions in their production or test environment. All researchers involved in the Bugminer platform must sign a confidentiality agreement.

First, web, mobile and network based targets will be defined on the systems. After the definitions of weaknesses have been made, cyber security researchers exploit weaknesses in the target systems and report findings and details to the companies or institutions on the platform. In addition to the details of weaknesses, researchers must also inform the platform of the steps to be taken for eliminating weaknesses and ways of protection. Thus, companies that test their applications and servers on Bugminer, reduce the time spent on vulnerability detection and prevention to a minimum.

After each reported weakness, the researcher is awarded a pre-defined award in exchange for the exploitation of weakness with the approval of Bugminer executives and corporate / business operators.

The greatest benefit Bugminer brings is a detailed analysis of the practices and presentations of many experts who have developed themselves on cyber security. The high security provided by the examination of many different people’s experiences is very important.”

HACKTRICK

SİBER GÜVENLİK KONFERANSI

HACKTRICK'18

Hacktrick'18 is the Cyber Security Conference, organized in collaboration with Octosec - ICTA. The Octosec team aims to bring together the leading names, institutions and companies in the cyber security sector with the Hacktrick Cyber Security Conference, which started with the slogan "The Cyber Security Summit between Universities" hosted by the University of Ankara in 2014. Hacktrick, hosted by Ankara University, Sabancı University, Anatolian University and ICTA in the past years, brings together private sector, government institutions and universities with the participation of thousands of people in cyber security framework. The team, which defines Hacktrick 2018 as a hacking festival that creates intelligence, entertainment, excitement and a bit of a fighting environment, is an organized event to share practical and theoretical security work with participants. They are aimed at passing useful, fun and informative trainings, technical presentations and fun competitions.
